

Watchman

Wie man ungültige oder fehlende Entities findet ...

- HACS → Watchman download
- Watchman als Dienst / Service hinzufügen
- Entwicklertools

The screenshot shows the Watchman report interface. At the top, there's a header with a shield icon and the text "Report watchman.report". Below it, a button says "Run the Watchman report". On the right, there's a question mark icon and a toggle switch. Under "Force configuration parsing", a checked checkbox says "Parse configuration files before generating the report. Usually, this is done automatically by Watchman, so this flag is typically not required." A "Help" link is next to it. Below that, a section titled "Advanced options" has a dropdown arrow. To the right of the dropdown is a shield icon. The main content area is titled "Benachrichtigungen" (Notifications) with a back arrow. It displays the following text:
-== Watchman Report ==
-== Congratulations, all 6 actions from your config are available!
-== Missing 2 entity(ies) from 14 found in your config:
light.hue_essential_spot_1 [missing] in: scripts.yaml:92,101
light.esszimmer [missing] in: scripts.yaml:106
-== Report created on 27 Oct 2025 06:50:44
-== Parsed 7 files in 0.14s., ignored 12 files
-== Generated in: 0.00s. Validated in: 0.00s.
At the bottom right of this area, it says "Vor 19 Sekunden" (19 seconds ago).
