

Net-Guard

Warum ist OMV nur auf IP 10 erreichbar ?

Installation

- Debian Trixie Image ...
- VM anlegen mit Bridge Interface auf br0
- Installation Headless
- IP anpassen in `/etc/network/interfaces`

[interfaces](#)

```
root@Net-Guard:~# cat /etc/network/interfaces
# This file describes the network interfaces available on your
system
# and how to activate them. For more information, see
interfaces(5).

source /etc/network/interfaces.d/*

# The loopback network interface
auto lo
iface lo inet loopback

# The primary network interface
allow-hotplug enp1s0
#iface enp1s0 inet dhcp
iface enp1s0 inet static
    address 192.168.30.8/24
    gateway 192.168.30.1
    dns-nameservers 8.8.8.8 8.8.4.4
```

- DNS temporär anpassen in `nano /etc/resolv.conf`

[resolv.conf](#)

```
root@Net-Guard:~# cat /etc/resolv.conf
# Generated by dhcpd from enp1s0.dhcp
# /etc/resolv.conf.head can replace this line
domain fritz.box
#nameserver 192.168.30.8
# /etc/resolv.conf.tail can replace this line
nameserver 8.8.8.8
```

- Update
su -
apt update && apt upgrade -y && apt install -y git git-lfs
silversearcher-ag wavemon hexedit sudo tcpdump iptraf mc htop dcfldd
nano usbutils openvpn ranger ncd u can-utils multitail fd-find lsof
x11vnc minicom joystick i2c-tools speedtest-cli iotop fio ir-keytable
curl inxi lshw nala fzf duf

AdGuard Home

- su -
- curl -s -S -L
<https://raw.githubusercontent.com/AdguardTeam/AdGuardHome/master/scripts/install.sh> | sh -s -- -v

```
root@Net-Guard:~# curl -s -S -L
https://raw.githubusercontent.com/AdguardTeam/AdGuardHome/master/scripts/install.sh | sh -s -- -v
starting AdGuard Home installation script
channel: release
operating system: linux
cpu type: amd64
AdGuard Home will be installed into /opt/AdGuardHome
checking tar
script is executed with root privileges
no need to uninstall
downloading package from
https://static.adtidy.org/adguardhome/release/AdGuardHome_linux_amd64.tar.gz to AdGuardHome_linux_amd64.tar.gz
successfully downloaded AdGuardHome_linux_amd64.tar.gz
unpacking package from AdGuardHome_linux_amd64.tar.gz into /opt

2025/10/18 10:20:35 [info] service: action has been done successfully
action=install system=linux-systemd
AdGuard Home is now installed and running
you can control the service status with the following commands:
sudo /opt/AdGuardHome/AdGuardHome -s
start|stop|restart|status|install|uninstall
```

- Kommandos

```
sudo /opt/AdGuardHome/AdGuardHome -s start
sudo /opt/AdGuardHome/AdGuardHome -s stop
sudo /opt/AdGuardHome/AdGuardHome -s restart
sudo /opt/AdGuardHome/AdGuardHome -s status
sudo /opt/AdGuardHome/AdGuardHome -s install
sudo /opt/AdGuardHome/AdGuardHome -s uninstall
```

TBC Auto-Updates: Füge Cron-Job: crontab -e, hinzufügen 0 3 * * 0 /opt/AdGuardHome/AdGuardHome -update >/dev/null 2>&1 (wöchentlich).

WireGuard

- su -
- apt install wireguard iptables
- net.ipv4.ip_forward = 1 muss gesetzt sein !

[50_net.conf](#)

```
root@Net-Guard:~# cat /etc/sysctl.d/50_net.conf
net.ipv4.ip_forward = 1
```

- Automatischer Start bei Systemstart
systemctl enable wg-quick@wg0
systemctl start wg-quick@wg0

sudo einrichten
